

### Legionella Awareness Training Seminar

Aquatrust is one the countries leading companies in water treatment technology, providing quality services that meet the individual requirements of our customers.

Aquatrust offer an effective and cost efficient range of services to help ensure the safety of water and air systems, through testing, monitoring and cleaning domestic, commercial and industrial water systems to ensure full compliance and employee safety.

In addition to this, Aquatrust carry out Legionella awareness training seminars for our customers and their on-site teams. We are offering potential new customers a complimentary Legionella awareness course which lasts up to two hours but gives people an insight and awareness that they need in order for them to meet their day to day responsibilities.

#### The seminar: Introduction

This is a general awareness course and outlines your obligation under ACoP(L8) regulations and the Health & Safety Executive HSG 274. There is no charge for attending, copies of handouts are provided and Legionella awareness training certificates are issued to those who attend.

The training seminar is not a sales pitch, but provides useful information for those who attend, which from an Aquatrust perspective acts as an opportunity to meet new contacts and hopefully build long standing relationships for the future.

Aquatrust Water & Ventilation Ltd is a Category 1 registered company with the Legionella Control Association, members of the Water Management Society, have 30 years experience in Legionella control and are accredited to ISO2001:2008, Investors In People, CHAS, Safecontractor, Watersafe, and ConstructionLine. You can be assured of getting trustworthy advice and assistance.

All Aquatrust employees possess the knowledge, training and competence to be able to offer comprehensive Legionella management packages at your site, through experience in the field and City & Guilds qualifications meaning their training has been externally verified by an external certification body.

#### What you will learn on the seminar

The Legionella Awareness training includes:

- Background to the disease
- Legislation
- Legionella risks in the workplace
- What are my duties
- Managing the risk
- Record keeping

Aquatrust believe in giving clients the confidence to believe their risks are addressed
